Connecting to Novell Server from Macintosh

From your personal Mac computer:

1. Be sure you are connected to the internet first via Wireless or Ethernet.
2. From the apple menu select GO - > Connect to Server - > type server name followed by .Scrippscollege.edu, click Connect

Students connect to MacStudent server  
Faculty and Staff connect to MacHome and MacDept servers  
Art Students connect to Artstorage server

3. Login with your Scripps Network account and select your volumes that you want to mount on the desktop.

When the volumes are mounted on the desktop they look like this, open them up to find your folders.

Note: Home area is where you will find your personal folder matching your username, same as your Z drive on a PC.
