

# Box Drive

## MACOS

Box Drive is a desktop application that gives users the ability to access Box content from the user's desktop environment. With Box Drive you will have easy access to your folders and documents stored on Box (when you are connected to the internet.) Box can also be configured on lab computers for quick access to your files. To use Box Drive you will need to download the application from the web.

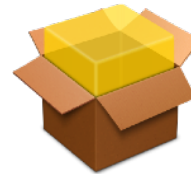

1

Download Box Drive for Mac at <https://www.box.com/resources/downloads/drive>

2

Launch Finder and select Downloads from the sidebar double click the Box.pkg to install Box Drive

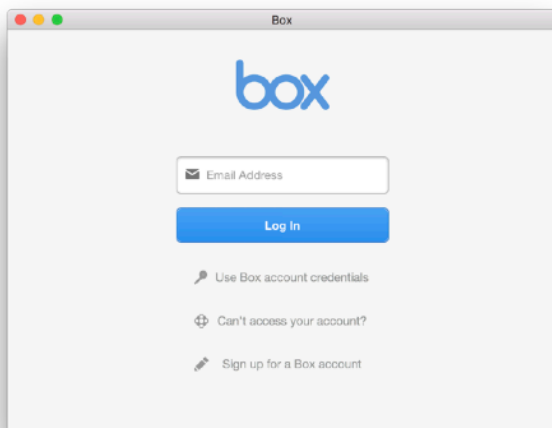

3

When the installer window pops up click Continue. To install Box Drive you will need to enter the Admin password.

4

After Box Drive has completed installation the window shown below will pop up asking you to sign in. Use SSO and sign in with your Scripps email.

5

You will be redirected to CAS. Use your Scripps College Network credentials to log on.

6

After the Initial sign in you will be promoted to take a one time quick tour of Box Drive. This is what Box Drive (Below) will look like in macOS. Box Drive will be accessible from finder like all of your other files and Apps.
